Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

Assembling the Phone

1. Insert the camera, as shown below:

   Note: The Yealink USB camera CAM50 is an optional accessory for the SIP-T58A IP phone. We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in reduced performance.

2. Attach the stand and adjust the angle of touch screen, as shown below:

   Note: The camera can only be connected to the USB port on the top of the phone. And the IP phone only supports the Yealink original USB camera CAM50.
3. Attach the optional wall mount bracket, as shown below:

Note: The reversible tab has a lip which allows the handset to stay on-hook when the IP phone is mounted vertically. For more information, refer to Yealink Wall Mount Quick Installation Guide for Yealink IP Phones.

4. Connect the handset and optional headset, as shown below:

Note: The headset should be purchased separately.

5. Connect the optional USB flash drive, as shown below:

Note: The USB port (on the rear of the phone) can also be used to connect color-screen expansion module EXP50 or USB headset. For more information on how to use EXP50, refer to Yealink EXP50 User Guide. For more information on how to use USB headset, refer to the documentation from the manufacturer.
6. Connect the AC power or PoE, as shown below:

Note: The IP phone should be used with Yealink original power adapter (5V/2A) only. The use of the third-party power adapter may cause the damage to the phone.

7. Connect to the network, as shown below:

You have two options for network connection. You can select one of them according to the current office environment.

a) Connect to the wired network:

Note: If you are connecting a PC to your phone, we recommend that you use the Ethernet cable provided by Yealink.

b) Connect to the wireless network:

1) Swipe down from the top of the screen to enter the control center.
2) Tap Settings -> Basic -> Wi-Fi.
3) Tap the On radio box in the Wi-Fi field.
   The phone will automatically search for available wireless networks in your area.
4) Select an available wireless network from the list of networks.
5) If the network is secure, enter its password in the Password field.
6) Tap Connect to connect to the wireless network.

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via web user interface or phone user interface.

Configuring Your Phone

Configuring via web user interface

Accessing the web user interface:
1. Swipe down from the top of the screen to enter the control center.
2. Tap Settings->Status to obtain the IP address of the phone.
3. Open a web browser on your computer, enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10"), and then press Enter.
4. Enter the user name (default: admin) and password (default: admin) in the login page and click Confirm.

Network Settings: Click on Network->Basic->IPv4 Config
You can configure the network settings in the following ways:

DHCP: By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Static IP Address: If the phone cannot contact a DHCP server for any reason, you need to configure IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

PPPoE: If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. Contact the ITSP for the PPPoE user name and password.

Note: The IP phone also supports IPv6, but IPv6 is disabled by default. The wrong network settings may result in inaccessibility of your phone and may have an impact on the network performance. Contact your system administrator for more information.

Account Settings: Click on Account->Register->Account X (X=1,2,3...15,16)

Parameters of the account:

Register Status: It shows the register status of the current account.
Line Active: You can select Enabled/Disabled to enable/disable the account.
Label: It is shown on the touch screen to identify the account.
Display Name: It is shown as Caller ID when placing a call.
Register Name: It is an authenticated ID for authentication provided by ITSP (required).
User Name: It is provided by ITSP for registration (required).
Password: It is provided by ITSP for registration (required).
Server Host: It is provided by ITSP for registration (required).
Register status icons on the touch screen:

- (Green) Registered
- (Gray) Register Failed
- (Green and Flashing) Registering

Note: Check with your system administrator if any error appears during the registration process or a specific configuration is required for your registration.

Configuring via phone user interface

**Network Settings:**
1. Swipe down from the top of the screen to enter the control center.
2. Tap **Settings**->**Advanced** (default password: admin)->**Network**->**WAN Port/VLAN** /**Web Server/802.1x/VPN/LLDP/CDP/NAT** to configure the network.

**Account Settings:**
1. Swipe down from the top of the screen to enter the control center.
2. Tap **Settings**->**Advanced** (default password: admin)->**Accounts** to configure the account.

Using Your Phone

**Status Icons**

The icons on the status bar of the touch screen give information about phone:

Using the Touch Screen

By default, the IP phone supports three idle screens. The home screen displays as below:

To navigate the touch screen:
- Swipe left or right to switch among different idle screens.
- Tap  to go back to the previous screen.
- Tap  to return to the idle screen.
- Tap  to view and manage recently used applications.

To change the wallpaper:
1. Long tap the empty spot on the idle screen.
2. Tap WALLPAPERS.
3. Select a desired picture.
4. Tap Set wallpaper.

To add a widget to the idle screen:
1. Long tap the empty spot on the idle screen.
2. Tap WIDGETS.
3. Drag the desired widget up/down/left/right to the destination spot on the idle screen.

Control Center and Notification Center

Swipe down from the top of the screen to enter the control center and the notification center.

To turn on/off common functions quickly, capture a screenshot or go to the Settings screen, tap corresponding icons.

Notification center displays the list of Notification, Missed Calls, Voice Mail and Forwarded.

To delete a specific notification, swipe left or right.
To view the details, tap the desired notification message.

To adjust the screen brightness, drag the slider.

Swipe up from the bottom of the screen to hide this screen.
Entering and Updating Data

To use onscreen keyboard:

1. Tap the input field, the onscreen keyboard will display on the touch screen:

   Tap to backspace.
   Label automatically to identify the context-sensitive features.
   • Tap Next to go to next field.
   • Tap Done to confirm the settings.
   • Tap Go to browse the web page.
   • Tap to switch to the uppercase input mode.
   • Tap to switch to the numeric & symbolic input mode.

   Tap to access input options to configure Input Languages or Android Keyboard Settings (AOSP).

2. When you finish entering, tap  to hide the onscreen keyboard.

To use keypad:
Dial or enter number.

To select a field option:
Tap the field name, tap the desired option in the pop-up dialog box.

Basic Call Features

Placing a Video/Voice Call

Using the handset:
1. Pick up the handset.
2. Enter the number, and then tap Send.

Using the speakerphone:
1. With the handset on-hook, press .
2. Enter the number, and then tap Send.

Using the headset:
1. With the headset connected, press to activate the headset mode.
2. Enter the number, and then tap Send.

Answering a Video/Voice Call

Using the handset:
Pick up the handset.

Using the speakerphone:
Press .

Using the headset:
Press .

Controlling Video During a Call

To change the video view:
• Tap Full Screen to display the video in full screen.
• Tap to return.

To turn on/off near-site video during a call:
Swipe down from the top of the screen to enter the control center, tap Video to turn on/off the near-site video.
Ending a Video/Voice Call

Using the handset:
Hang up the handset or tap the EndCall soft key.

Using the speakerphone:
Press \[\text{ gesture}\] or tap the EndCall soft key.

Using the headset:
Tap the EndCall soft key.

Redial
- Press \[\text{ gesture} to enter the Placed Calls list, and then tap the desired entry.
- Press \[\text{ gesture} twice when the phone is idle to dial out the last dialed number.

Call Mute and Un-mute
- Press \[\text{ gesture\] to mute the microphone during a call.
- Press \[\text{ gesture\] again to un-mute the call.

Call Hold and Resume
To place a call on hold:
Press \[\text{ gesture\] or tap the Hold soft key during an active call.

To resume the call, do one of the following:
- If there is only one call on hold, press \[\text{ gesture\] or tap the Resume soft key.
- If there is more than one call on hold, tap the call you want to resume, and press \[\text{ gesture\] or tap the Resume soft key.

Call Transfer
You can transfer a call in the following ways:

Blind Transfer
1. Press \[\text{ gesture\] or tap the Transfer soft key during a call. The call is placed on hold.
2. Enter the number you want to transfer to.
3. Press \[\text{ gesture\] .

Semi-Attended Transfer
1. Press \[\text{ gesture\] or tap the Transfer soft key during a call. The call is placed on hold.
2. Enter the number you want to transfer to, and then press \[\text{ gesture\] .
3. Press \[\text{ gesture\] or tap the Transfer soft key when you hear the ring-back tone.

Attended Transfer
1. Press \[\text{ gesture\] or tap the Transfer soft key during a call. The call is placed on hold.
2. Enter the number you want to transfer to, and then press \[\text{ gesture\] .
3. Press \[\text{ gesture\] or tap the Transfer soft key when the second party answers.

Call Forward
To enable call forward:
1. Swipe down from the top of the screen to enter the control center.
2. Tap Settings->Features->Call Forward.
3. Select the desired forward type:
   - Always Forward----Incoming calls are forwarded unconditionally.
   - Busy Forward----Incoming calls are forwarded when the phone is busy.
   - No Answer Forward----Incoming calls are forwarded if not answered after a period of time.
4. Enter the number you want to forward to. For No Answer Forward, tap the After Ring Time field, and then tap the desired ring time to wait before forwarding.
5. Tap \[\text{ gesture\] to accept the change.
Call Conference
1. Tap the **Conference** soft key during an active call. The call is placed on hold.
2. Enter the number of the second party, and then press [#] or tap **Conference**.
3. Tap the **Conference** soft key again when the second party answers. All parties are now joined in the conference.
4. Tap the **EndCall** soft key to disconnect all parties.

Note: You can split the conference call into two individual calls by tapping the **Split** soft key.

Voice Message
Message waiting indicator on the idle screen indicates that one or more voice messages are waiting at the message center. The power indicator LED slowly flashes red.

**To listen to voice messages:** (Ensure the voice mail code is already configured on the phone.)

1. Do one of the following:
   - Press [•]
   - Swipe down from the top of the screen to enter the notification center, tap **Voice Mail** and then select the desired item.
2. Follow the voice prompts to listen to your voice messages.

Customizing Your Phone

Call History
1. Tap 📩, and then select the desired call list on the left.
2. Drag up and down to scroll.
3. Tap ☑ after the desired entry, and then you can do the following:
   - Tap **Send** to place a call.
   - Tap **Add** to add the entry to the local directory.
   - Tap **Edit** to edit the phone number of the entry before placing a call.
   - Tap **Blacklist** to add the entry to the blacklist.
   - Tap **Delete** to delete the entry from the list.

Contact Directory

**To add a contact:**
1. Tap 📞, and then select the desired group on the left.
2. Tap + to add a contact.
3. Enter a unique contact name in the **Name** field and contact numbers in the corresponding fields.
4. Tap ✔ to accept the change.

**To edit a contact:**
1. Tap 📞, and then select the desired group on the left.
2. Tap ☑ after the desired contact.
3. Edit the contact information.
4. Tap ✔ to accept the change.

**To delete a contact:**
1. Tap 📞, and then select the desired group on the left.
2. Tap ☑ after the desired contact and then tap **Delete**.
3. Tap **OK** when the touch screen prompts “Delete selected item?”.

Note: You can add contacts from call history easily. For more information, refer to **Call History** above.

Volume Adjustment
- Press 🎧 during a call to adjust the receiver volume of the handset/speakerphone/headset.
- Press 🎧 when the phone is idle or ringing to adjust the ringer volume.
- Press 🎧 to adjust the media volume in the corresponding screen.
About us
Founded in 2001, Yealink, a leading provider of VoIP Phone and IP communication solutions, has been focusing on VoIP products characterized by reliable quality, easy deployment and affordable price for more than a decade. Today, customers from over 140 countries rely on Yealink as the backbone of global collaboration to extend the value of network communications.

More about Yealink
Since 2001, Yealink has continued to develop state-of-the-art, hi-tech VoIP communication terminals that include IP video phones, IP phones and USB phones. With a worldwide market in more than 140 countries, the company has also established a first-class international service network.

Our priorities are quality, functionality, ease-of-use, customer support and competitive pricing. To provide new solutions for the future in this fast-evolving sector, Yealink’s large, talented and highly-experienced VoIP R&D team is totally purcommitted to the suit of excellence.

To date, we have passed more than 80 interoperability tests and meet certification requirements set by leading VoIP system and platforms. Yealink works in close partnership with T-Mobile, Telefonica, Portugal Telecom and other leading telecommunication service providers.
