About This Guide

Thanks for choosing Yealink CP960 IP conference phone, which comprises the power of the Android 5.1 operating system and is exquisitely designed for the medium-to-large conference room. CP960 is a 5-inch touchable conference phone which simply putting all of the key conferencing functions at your fingertips, allowing users to enjoy its powerful business telephony features, such as Call Hold, Call Transfer, Call and Conference Recording, Multicast Paging and five-way Conference over an IP network. Meanwhile, users can benefit from two optional expansion microphones for wider voice pickup range.

This guide provides everything you need to quickly use your new phone. Firstly, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Quick Start Guide which can be found in your phone package before you set up and use the IP phone. As you read this guide, keep in mind that some features are only configurable by your system administrator or determined by your phone environment. As a result, some features may not be enabled or may be operated differently on your phone. Additionally, the examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen.

Read the Yealink Products Regulatory Notices guide for all regulatory and safety guidance.

Related Documentation

You can obtain additional information for CP960 on the Yealink support page.

The following types of related documents are available on each support page:

- Release Notes, which details bug fixes and feature enhancements when an update is released.
- Quick Start Guide, which describes how to assemble your phone and configure the basic phone features.
- Administrator Guide, which provides the detailed information on how to configure phone features for system administrator.
- Regulatory Notice, which provides information about all regulatory and safety guidance.

In This Guide

Chapters in this guide include:

- Chapter 1 About This Guide
- Chapter 2 Getting Started with Your Phone
- Chapter 3 Customizing Your Phone
- Chapter 4 Audio Settings
- Chapter 5 Directory
- Chapter 6 Call History
- Chapter 7 Call Features
- Chapter 8 Advanced Features
- Chapter 9 System Applications
- Chapter 10 Using Your IP Phone with PC
- Chapter 11 Using the CP Wireless Expansion Mic CPW90
- Chapter 12 Using CP960 Star Connection Feature
- Chapter 13 Maintaining Your Phone
- Chapter 14 Appendix - Menu Structure
Getting Started with Your Phone

This chapter provides the overview of phone hardware and screen layout, and introduces how to navigate your phone for the best performance.

Topics

Hardware Overview

Hardware Overview

Topics

CP960 Hardware
Mute Touch Key LED Indicators

CP960 Hardware

The following figure shows the primary hardware component of CP960 IP phone:
<table>
<thead>
<tr>
<th>No.</th>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Three Internal Microphones</td>
<td>Provide 20-feet and 360-degree coverage to transmit sound to other phones.</td>
</tr>
</tbody>
</table>
| 2   | Mute Touch Keys          | • Indicate phone statuses.  
                               • Toggle mute feature.                                                   |
| 3   | Speaker                  | Provides hands-free (speakerphone) audio output.                            |
| 4   | Touch Screen             | 5 inches (720 x 1280) capacitive (5 points) touch screen with two idle screens. Tap to select items and navigate menus. Shows information about calls, messages, time, date and other relevant data:   
                               • Call information—caller ID, call duration 
                               • Icons (for example, 😎) 
                               • Missed call list or second incoming caller information 
                               • Prompt text (for example, “Save successfully!”) 
                               • Time and date |
| 5   | Volume Touch Keys        | Adjust the volume of the speaker, ringer or media.                          |
| 6   | HOME Touch Key           | Returns to the idle screen.                                                 |
| 7   | Security Slot            | Allows you to connect a universal security cable to your phone so you can lock down your phone. The phone will not be removed after locked. |
| 8   | 3.5mm Audio-out Port     | Allows you to connect an optional external speaker.                         |
| 9   | Network Port             | Allows you to connect the IP phone to the wired network.                    |
### Getting Started with Your Phone

#### No. | Item              | Description
--- | ----------------- | ----------------------
10  | USB Ports        | Allow you to connect an optional USB flash drive or CPW90 charging cradle.  
11  | Micro USB Port   | Allows you to connect a PC and turn CP960 into an external speaker and microphone for your PC.  

### Mute Touch Key LED Indicators

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
</table>
| Solid red      | The phone is initializing.  
                | The phone is muted.          |
| Flashing red   | The phone is ringing.        |
| Solid green    | The phone is placing a call. 
                | There is an active call on the phone. |
| Off            | The phone is powered off.    
                | The phone is idle.           |

### Screen and Icons

Before you use the phone, you need to be familiar with the state of your phone, including phone screen layout and icons.

#### Topics

- Control Center and Notification Center
- Idle Screen
- Configuration Screen
- Dialing Screen
- Calls Screen
- Icons in the Status Bar
- CP960 Line Key Icons
- Call History Icons

### Control Center and Notification Center

Control center or notification center allows you to access common features or view important notifications quickly. You cannot enter the control center and notification center when calling, ringing or in a call.

#### Procedure

1. Swipe down from the top of the screen to enter the control center and the notification center:
<table>
<thead>
<tr>
<th>No.</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Time and date</td>
<td>Display the phone’s time and date.</td>
</tr>
<tr>
<td>2</td>
<td>• Indicate the number of the connected wireless microphones. • Tap to enter the wireless microphone settings screen.</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Control Center</td>
<td>Drag the slider to adjust the screen brightness quickly.</td>
</tr>
<tr>
<td></td>
<td>Backlight Slider</td>
<td>• Tap to turn Wi-Fi on or off quickly. • Long tap to enter Wi-Fi setting screen.</td>

**Navigating Menus and Fields**

**Procedure**

1. To navigate menus and fields, you can:
   - Tap corresponding keys on the touch screen.
   - Tap menu items, fields, and arrows on the touch screen.
   - Press keys on the phone keypad.
2. To operate your phone using gestures, follow these tips:
### Entering Characters

The phone provides onscreen keyboard and onscreen dial pad to enter data. Onscreen dial pad provides a standard key layout, which enables users to use existing or familiar key positions.

### Topics

**Using the Onscreen Keyboard**  
**Using the Dial Pad**

### Using the Onscreen Keyboard

Before using the onscreen keyboard to enter data, you need to know the function of the keys on the onscreen keyboard. The phone supports two kinds of input methods: English (UK) and Google Pinyin.

**When you use the onscreen keyboard, the other following things you need to know:**

<table>
<thead>
<tr>
<th>If you want to</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Position the cursor.</td>
<td>Tap to position.</td>
</tr>
</tbody>
</table>
| Select all characters.      | 1. Long tap the entered character(s).  
                               2. Do one of the following:  
                               • Tap on the top of the touch screen. |
<table>
<thead>
<tr>
<th>If you want to</th>

Changing the Administrator Password

Some features on the phone can be set from the Advanced Settings only. By default, you require an administrator password to access the Advanced Settings. The default password is “admin”.

For security reasons, you should change the default password as soon as possible. If you do not change the default password, the phone displays a warning icon in the status bar.

Procedure
1. Navigate to Settings > Advanced Settings > Set Password.
2. Enter the desired value in the Old PWD, New PWD and Confirm PWD field respectively.
3. Tap ✓.

Related Topic
Investigating Warnings

Wallpaper

The IP phone comes with a default picture, you can change it to another built-in picture.

Note
You can also use a custom picture uploaded by your system administrator as the wallpaper.

Topic
Changing Wallpaper on Idle Screen

Changing Wallpaper on Idle Screen

Procedure
1. Navigate to **Settings** > **Basic Settings** > **Display** > **Wallpaper**.
2. Select the desired wallpaper image.
3. Tap **Set wallpaper**.

### Screen Saver

The screen saver starts automatically when the IP phone has been idle for the preset waiting time. You can stop the screen saver at any time by touching the screen or tapping any key. When your phone is idle again after a preset waiting time, the screen saver starts again. By default, your screen displays a built-in picture when the screen saver starts.

### Topics

- Changing the Waiting Time for Screen Saver
- Setting the Screen Saver Type

### Changing the Waiting Time for Screen Saver

You can change the waiting time for the screen saver.

#### Procedure

1. Navigate to **Settings** > **Basic Settings** > **Display** > **Screen Saver**.
2. Select the desired waiting time from the **Screensaver Waiting Time** field.
3. Tap **✓**.

### Setting the Screen Saver Type

The IP phone supports four screen saver types: **Clock**, **Colours**, **Photo Frame** and **Photo Table**.

#### Procedure

1. Navigate to **Settings** > **Basic Settings** > **Display** > **Screen Saver**.
2. Tap the radio box after desired screen saver type.
3. Tap **✓**.
Changing the Screen Backlight Brightness and Time

You can change the backlight brightness of the touch screen during phone activity and inactivity. The backlight brightness automatically changes when the phone is idle for a specified time.

You can change the screen backlight brightness and time in the following settings:

**Backlight Active Level**: The intensity of the touch screen when the phone is active.

**Backlight Time**: The delay time to change the brightness of the touch screen when the phone is inactive. Backlight time includes the following settings:

- **Always On**: Backlight is on permanently.
- **15s, 30s, 1min, 2min, 5min, 10min** or **30min**: Backlight is changed when the phone is inactive after the designated time.

Customizing Your Phone

Changing the Language
The default phone language is English. You can change the phone language.

Procedure
1. Navigate to Settings -> Basic Settings -> Language & Input -> Language.
2. Select the desired language.
3. Tap ✓.
The phone language is changed to the selected one.

Changing the Input Method
The phone supports two kinds of input methods: Android Keyboard (AOSP) – English (UK) and 谷歌拼音输入法. The default input method is English (UK). You can change the currently used input method.

Procedure
1. Navigate to Settings -> Basic Settings -> Language & Input -> Current Input.
2. Tap the desired input method in the pop-up dialog.
   You can also long tap the following keys on the onscreen keyboard to change the input method. The following takes Android Keyboard (AOSP) – English (UK) input method as an example:

Time & Date
You can set the time and date manually. The time and date formats are also customizable.

Topics
Setting the Time and Date Manually
Changing the Time and Date Format

Setting the Time and Date Manually
If your phone cannot obtain the time and date automatically, you can set it manually.

Before You Begin
Check with your system administrator to find out if the manual mode has been enabled.

**Procedure**

1. Navigate to **Settings -> Basic Settings -> Time & Date -> General**.
2. Enter the date and time in the corresponding fields.
3. Tap ✔.

The time and date set on the phone will be changed accordingly.

**Changing the Time and Date Format**

You can customize the date with various time and date formats.

The built-in date formats are listed as below:

<table>
<thead>
<tr>
<th>Date Format</th>
<th>Example (2016-09-02)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WWW MMM DD</td>
<td>Fri Sep 02</td>
</tr>
<tr>
<td>DD-MMM-YY</td>
<td>02-Sep-16</td>
</tr>
<tr>
<td>YYYY-MM-DD</td>
<td>2016-09-02</td>
</tr>
<tr>
<td>DD/MM/YYYY</td>
<td>02/09/2016</td>
</tr>
<tr>
<td>MM/DD/YY</td>
<td>09/02/16</td>
</tr>
<tr>
<td>DD MMM YYYY</td>
<td>02 Sep 2016</td>
</tr>
<tr>
<td>WWW DD MMM</td>
<td>Fri 02 Sep</td>
</tr>
</tbody>
</table>

**Note**

Your system administrator can customize the date format.

**Procedure**

1. Navigate to **Settings -> Basic Settings -> Time & Date -> Time & Date Format**.
2. Select the desired date format from the **Date Format** field.
3. Select the desired time format from the **Time Format** field.
4. Tap ✔.

**Phone Lock**

Phone lock helps you protect your phone from unauthorized use. You can lock your phone manually when you are not using it. The phone is also locked automatically after being idle for a specified time.

Phone Lock and Waiting Time

When the phone is locked, mute touch keys and touch screen (except ✉️) are locked. You are only allowed to:

- Dial emergency numbers.
- Reject incoming calls.
- Answer incoming calls.
- End the call

You can set a waiting time to lock your phone automatically. If the waiting time is set to 0, the phone will not be automatically locked. You need to lock your phone manually.

Setting the Phone Lock

By default, the phone lock feature is disabled. If you want to lock your phone, you need to enable this feature. You can specify the waiting time to lock your phone automatically.

Procedure

1. Navigate to Settings -> Advanced Settings (default password: admin) -> Phone Lock.
2. Select Enabled from the Lock Enable field.
3. Enter the desired interval (0 - 3600 seconds) in the Auto Lock field.
4. Tap ✓.

Related Topic

Phone Lock and Waiting Time

Setting a Phone Lock Key

Procedure

1. Navigate to Settings -> Features -> Dsskeys.
2. Select the desired line key.
3. Select Key Event from the Type field.
4. Select Phone Lock from the Key Type field.
5. (Optional.) Enter the string that will display on the touch screen in the Label field.
6. Tap ✓.

Locking Your Phone Manually

If you have specified a timeout to lock your phone automatically, your phone will be locked after being idle for a specified time. You can also lock your phone manually.

Before You Begin

Make sure that the phone lock is enabled and you have set a phone lock key.

Procedure

1. Tap the phone lock key.

When the phone is locked, the lock icon appears on the phone screen.

Related Topics

Unlocking Your Phone

Procedure

1. Tap the screen or tap the Mute touch key, the phone screen prompts you to enter a unlock PIN.
2. Enter the desired PIN (default: 123) in the Unlock PIN field.
3. Tap OK.
   The lock icon disappears from the phone screen.

Note
If you forget the unlock PIN, you can enter the administrator password to unlock your phone, and then change the unlock PIN.

Changing Your Phone Unlock PIN
The default unlock PIN is 123, you can change it at any time for security reasons.

Procedure

1. Navigate to Settings > Basic Settings > Change PIN.
2. Enter the desired value in the Old PIN, New PIN and Confirm PIN field respectively.
   The unlock PIN length must be within 15 digits.
3. Tap ✓.

Line Keys
You can assign predefined functionalities to line keys. You can also define a label for a line key feature which will appear on the touch screen. Line keys allow you to quickly access features such as recall and voice mail. The line key can indicate the monitored status when the line keys are assigned with particular features, such as BLF. The default key type of line key 1 is Line. The default key type of line key 2-30 is N/A, which indicates that this line key provides no functionality until configuration.

Assigning Functionality to a Line Key

Procedure

1. Do one of the following:
   * Tap on the top-right of the line key list.
Customizing Your Phone

- From the Home screen, and then navigate to Settings > Features > Dsskey.
  Tap the desired line key.

2. Select the desired key type from the Type field.
3. Configure the settings for the corresponding key type.
   For example, if you want to a line key for intercom, configure the Account ID, Label, Value, and Extension for the line key.
4. Tap ✓.

**Changing the Location of the Line Keys**

You can change the line key's location to a blank area on the Line keys field. You can also change the location of two line keys. And the operating instructions are almost the same. The following takes how to change the location of two line keys as an example.

**Procedure**

1. Tap the desired page key if required.
2. Drag a line key to the desired location at which another line key locates.
   For example, exchange the locations of line key 1 and line key 2:
Deleting a Line Key

Procedure
1. Drag the desired line key to the Delete field.

3. Tap OK.

Wireless Network
The IP phone can be connected to the wireless network if Wi-Fi is available within the area. For more information, contact your system administrator.
Customizing Your Phone

Note
Enabling Bluetooth may degrade your wireless network connection. For improved wireless network performance, you should disable Bluetooth when it is not in use.

Activating the Wi-Fi Mode

Procedure
1. Do one of the following:
   - Swipe down from the top of the screen to enter the control center.
   - From the home screen, navigate to Settings > Basic Settings > Wi-Fi.
2. Turn on the Wi-Fi.
   The IP phone scans the available wireless networks in your area.
   The touch screen displays the Wi-Fi icon.

Deactivating the Wi-Fi Mode

You should deactivate the Wi-Fi mode when you need to connect your phone to the wired network.

Procedure
1. Do one of the following:
   - Swipe down from the top of the screen to enter the control center.
   - From the home screen, navigate to Settings > Basic Settings > Wi-Fi.
2. Turn off the Wi-Fi.
   The Wi-Fi icon disappears from the status bar.

Connecting to the Wireless Network

Three ways to connect your phone to the wireless network:

- Manually connect to an available wireless network
- Wi-Fi Protected Setup (WPS)
- Manually add a wireless network

When the phone is connected to a wireless network, the Wi-Fi icon 🌐 will display on the status bar.

Topics
Connecting to an Available Wireless Network Manually
Connecting to the Wireless Network Using Wi-Fi Protected Setup (WPS)
Adding a Wireless Network Manually
Connecting to an Available Wireless Network Manually

Before You Begin

Get the password of the wireless network from your system administrator. Make sure that the Wi-Fi mode is activated.

Procedure

1. Navigate to Settings > Basic Settings > Wi-Fi.
   The phone will automatically search for available wireless networks in your area.
2. (Optional.) To re-search the available network, tap and then tap Scan.
3. Tap the desired wireless network (SSID) to connect to it.
4. If the network is secure, enter its password in the Password field.
   Do the following:
   - Tap the Show password radio box to make the password visible.
   - Tap the Show advanced options radio box to configure the HTTP proxy for the Browser application.
5. Tap Connect to connect to the wireless network.
   Once the connection has completed successfully, the prompt “Connected” appears under the corresponding SSID.

Activating the Wi-Fi Mode

Connecting to the Wireless Network Using Wi-Fi Protected Setup (WPS)

Wi-Fi Protected Setup (WPS) provides simplified mechanisms to configure secure wireless networks. WPS can automatically configure a wireless network with a network name (SSID) and strong WPA data encryption and authentication.

Two methods supported by Yealink IP phones in the Wi-Fi protected setup:

- **Push Button Configuration (PBC)**: The user simply has to push the WPS key on both the IP phone and gateway/router to connect.
• **Personal Identification Number (PIN):** The user has to enter a WPS PIN generated randomly by the IP phone on the gateway/router to connect.

**Before You Begin**

Make sure that the Wi-Fi mode is activated.

**Push Button Configuration (PBC)**

**Procedure**

1. Navigate to **Settings** > **Basic Settings** > **Wi-Fi**.
2. Tap ⬛ and then tap **WPS**.
   The touch screen prompts “Press the Wi-Fi Protected Setup button on your router. It may be called “WPS” or contain this symbol.”.
3. Long press the WPS key on your gateway/router.
   Once WPS setup has completed successfully, the touch screen will prompt “Connected”.

**Personal Identification Number (PIN)**

**Procedure**

1. Navigate to **Settings** > **Basic Settings** > **Wi-Fi**.
2. Tap ⬛ > **WPS-PIN**.
   The touch screen prompts “Enter pin XXX on your Wi-Fi router. The setup can take up to two minutes to complete.”.
3. Note the PIN code.
4. Log into your gateway/router's web interface, and configure it to search the clients. For more information, refer to the documentation from the gateway/router manufacturer.
   Once the WPS-PIN setup has completed successfully, the gateway/router's web interface will prompt success.

**Adding a Wireless Network Manually**

If your gateway/router has SSID broadcast disabled, it might not appear in the scanning results. In that case, you must manually add a wireless network.

**Before You Begin**

Get the available wireless network information from your system administrator. Make sure that the Wi-Fi mode is activated.

**Procedure**

1. Navigate to **Settings** > **Basic Settings** > **Wi-Fi**.
2. Tap ⬛ > **Add**.
3. Enter the desired value in the **Network SSID** field.
4. Tap the **Security** field.
5. Tap the desired value.
   - If you select **WEP** or **WPA/WPA2 PSK**, enter the password in the **Password** field.
   - If you select **802.1x EAP**, tap the **EAP method** field, select the desired EAP method and then enter the desired values in the corresponding fields.
6. Do the following:
- Tap the **Show password** radio box to make the password visible.
- Tap the **Show advanced options** radio box to configure the HTTP proxy for the **Browser** application.

7. Tap **Save**.

**Viewing the Wireless Network Information**

**Procedure**

1. Navigate to **Settings** > **Basic Settings** > **Wi-Fi**.
2. Tap **Wireless Status** to view the detailed wireless network information (e.g., Profile Name, SSID or Signal Strength).

![Wireless Status](image)

**Disconnecting the Wireless Network Connection**

You can disconnect the wireless network connection from your phone.

**Procedure**

1. Navigate to **Settings** > **Basic Settings** > **Wi-Fi**.
2. Tap the connected SSID (the top one).
4. Tap **Forget**.
You can also disconnect the wireless network by deactivating the Wi-Fi mode.

Deactivating the Wi-Fi Mode

**Connecting a Mobile Phone Using Bluetooth**

Bluetooth enables low-bandwidth wireless connections within a range of 10 meters (32 feet). The best performance is in the 1 to 2 meters (3 to 6 feet) range.

You can pair and connect the Bluetooth-enabled mobile phone with your IP phone. After connection, you can do the following:

- Make and receive mobile calls on the IP phone
- Use the IP phone as a Bluetooth speaker for music played on your mobile phone.
- Merge the calls on your IP phone, the PC and connected mobile phone into to a hybrid UC conference (refer to [Creating a Hybrid UC Conference](#)).

**Note**

Not all mobile phones support this feature. Contact your system administrator for more information.

**Tip**

You can also connect a PC (operation system: macOS and Window10) via Bluetooth. After connection, you can place/answer a call via a softphone installed on PC using the IP phone.

**Topics**

**Activating the Bluetooth Mode**

**Procedure**

1. Do one of the following:
   - Swipe down from the top of the screen to enter the control center.
   - Tap .
   - From the home screen, navigate to Settings > Basic Settings > Bluetooth.
2. Turn on the Bluetooth.
   The IP phone scans the available Bluetooth device automatically.
   The touch screen displays the Bluetooth icon.

**Deactivating the Bluetooth Mode**

You can deactivate the Bluetooth mode when you no longer use a Bluetooth device.

**Procedure**

1. Do one of the following:
   - Swipe down from the top of the screen to enter the control center.
   - Tap .
   - From the home screen, navigate to Settings > Basic Settings > Bluetooth.
2. Turn off the Bluetooth.
   The Bluetooth icon disappears from the status bar.

**Pairing and Connecting the Bluetooth-enabled Mobile Phone**

You can pair up with countless mobile phones with your IP phone but only one mobile phone can be connected at a time. After connection, the IP phone will automatically find an available line key and assign the line key for Mobile Account. The Mobile Account key's default label is "My Mobile". If there is no available line key, you can assign it manually.

**Before You Begin**

Make sure that the Bluetooth-enabled mobile phone is discoverable.

**Procedure**

1. Navigate to Settings > Basic Settings > Bluetooth.
2. Tap to search for the mobile phone.
3. Tap the desired Bluetooth-enabled mobile phone to connect to the mobile phone.
4. Tap Pair on both mobile phone and IP phone.
   The connection will be completed successfully with a prompt appears under the Bluetooth-enabled mobile phone name.
And the IP phone automatically assigns a Mobile Account key.

Adjusting the Ringer Volume

When the phone is idle or ringing, you can increase or decrease the ringer volume. If ringer volume is adjusted to the minimum, the minimum volume icon will appear on phone screen.

Procedure

1. Tap the Volume touch key to increase or decrease the ringer volume.

Adjusting the Media Volume

You can adjust the media volume in multiple scenarios. For example, when playing audio files in the Recorder application.
**Procedure**

1. Tap one of the Volume touch keys to adjust the media volume.

   The volume slider appears, you can also drag the volume slider to adjust the media volume.

![Screenshot of Audio Recorder]

**Setting the Ring Tone**

You can choose from a variety of ring tones to distinguish your phone from your neighbor’s. You can set distinctive ring tones for groups or contacts in your local directory, so you can identify the caller when your phone rings.

You can also choose a unique ring tone for different accounts on your phone.

The ring tones are used according to this priority: Contact ring tone > Group ring tone > Account ring tone > Phone ring tone.

**Note**

You can also choose a custom ring tone uploaded by your system administrator.

**Topics**

- Setting a Ring Tone for the Phone

*Adjusting the Audio Volume*

**Setting a Ring Tone for an Account**

You can select a unique ring tone for an individual account.

**Procedure**

1. Navigate to **Settings > Basic Settings > Sound > Ring Tones**.
2. Select the desired account.
3. Select the desired ring tone.
   - The ring tone is played automatically. You can tap the Volume key to adjust the ringtone volume.
   - If **Common** is selected, this account will use the ring tone selected for the phone.
4. Tap ✓.

**Related Topic**

*Adjusting the Audio Volume*

**Setting a Ring Tone for a Group**

You can select a unique ring tone for various groups in your local directory. This helps you quickly identify callers according to the ring tones.

By default, the **Auto** is selected, this means that the group uses the ring tone according to this priority: Contact ring tone>Account ring tone>Phone ring tone. If a specific ring tone is selected, this group will use the ring tone according to this priority: Contact ring tone>Group ring tone.

**Note**

You can only set a ring tone for a group that is added manually.

**Procedure**

1. Tap 📞 -> **Local Directory**.
2. Tap ☐ after the desired group, and then tap **Ring**.
3. Tap the desired ring tone in the pop-up dialog box.
   - The ring tone is played automatically. You can tap the Volume key to adjust the ringtone volume.
4. Tap **OK**.

**Setting a Ring Tone for a Contact**

You can select a unique ring tone for various contacts in your directory. This helps you quickly identify callers according to the ring tones.

By default, the **Auto** is selected, it means that the contact uses the ring tone according to this priority: Group ring tone>Account ring tone>Phone ring tone.

**Procedure**
1. Tap 📞.
2. Tap Local Directory to select the desired contact group.
3. Tap 🔄 after the desired contact.
4. Select the desired ring tone from the Ring field.
   The ring tone is played automatically. You can tap the Volume key to adjust the ringtone volume.
5. Tap ✅.

Setting the Key Tone
You can set the phone to produce a sound when pressing the keypad keys. The key tone is enabled by default.

Procedure
1. Navigate to Settings > Basic Settings > Sound > Key Tone.
2. Turn on Key Tone.
3. Tap ✅.

Enabling Touch Sounds
If you enable touch sounds, the phone will produce a sound when you tap an option on the touch screen.

Procedure
1. Navigate to Settings > Basic Settings > Sound > Touch Sounds.
2. Turn on Touch Sounds.
3. Tap ✅.

Configuring Notification Sound
The phone will produce a notification sound when receiving a notification (e.g., incoming email notification).

Procedure
1. Navigate to Settings > Basic Settings > Sound.
2. Tap the desired notification sound from the Notification Sound field.
   The notification sound is played automatically. You can tap the Volume key to adjust the notification sound.
3. Tap OK.

Enabling Silent Mode
If you turn on the silent mode, the IP phone won’t produce ring tone/key tone/touch sound/notification sound from phone’s speaker.

Procedure
1. Do one of the following:
   - From the home screen, navigate to Settings > Basic Settings > Sound.
Turn on Silent Mode and then tap ✓.

- Long tap the left Volume touch key to decrease the ringer volume to the minimum.
- Swipe down from the top of the screen to enter the control center and toggle Silent on.

**Note**

You may have no permission to turn on the silent mode. Contact your system administrator for more information.
Directory

The Yealink IP phones provide several types of phone directories and what the system administrator has set for you.

The phones provide the following types of directories:

- Local Directory
- Blacklist
- Remote Phone Book

Local Directory

You can store up to 1000 contacts and 48 groups in your local directory, allowing you to edit, delete, search or simply dial a contact from the local directory.

Topics

Managing the Local Directory Groups
Managing the Local Directory Contacts
Moving a Local Directory Contact to Blacklist
Searching for Contacts

Managing the Local Directory Groups

You can add, edit and delete contacts group in the local directory.

Topics

Adding Contact Groups

Deleting Contact Groups

Adding Contact Groups

To organize your contacts and make them easier to find, you can add additional groups in the local directory.

When you add a group in the local directory, you can specify a ring tone for this group.

Procedure

1. Tap ☑️ -> Local Directory.
2. Tap + after Custom Grouping.
3. Enter the desired group name.
4. Tap OK.
5. Tap ✕ after the group name and then tap Ring to specify a ring tone for the group.
6. Tap the desired ring tone in the pop-up dialog box.
7. Tap OK.

Editing Contact Groups

You can change the group name at any time.

Procedure
1. Tap ⌨️ - Local Directory.
2. Tap ☐️ after the desired group and then tap Rename.
3. Edit the group name in the highlighted field.
4. Tap OK.

**Deleting Contact Groups**

You can delete a group from the local directory at any time.

Procedure

1. Tap ⌨️ - Local Directory.
2. Tap ☐️ after the desired group and then tap Delete.
   - The phone screen prompts you whether to delete the group.
3. Tap OK.

**Managing the Local Directory Contacts**

You can add, edit and delete contacts in the local directory. You can delete a contact or all contacts from the Local Directory.

**Topics**

Adding Contacts
Editing Contacts
Deleting a Contact
Deleting All Contacts

**Adding Contacts**

You can add 100 contacts to your local directory. You can set other information for your contact, including:

- Specify an account to use when calling this contact.
- Specify a ring tone for this contact.
- Specify a contact photo to this contact.

**Procedure**

1. Tap ⌨️.
2. If you want to add a contact to the specified contact group, tap Local Directory to select the desired contact group.
3. Tap ☐️.
4. Enter the name and the office, mobile or other numbers in the corresponding fields.
5. Tap the desired account from the Account field.
6. Tap the desired ring tone from the Ring field.
7. Tap the desired photo from the Photo field.
8. Tap ✔️.

If the contact already exists in the local directory, the phone will prompt “Contact name existed!”.
**Editing Contacts**
You can change or add more information to your contacts at any time.

**Procedure**

1. Tap 📞.
2. If you want to edit a contact from the specified contact group, tap Local Directory to select the desired contact group.
3. Tap 📞 after the desired contact.
4. Tap the desired field to edit the contact information.
5. Tap ✔️.

**Deleting a Contact**

**Procedure**

1. Tap 📞.
2. If you want to delete a contact from the specified contact group, tap Local Directory to select the desired contact group.
3. Tap 📞 after the desired contact.
4. Tap Delete.
   The phone screen prompts you whether to delete the contact.
5. Tap OK.

**Deleting All Contacts**

**Procedure**

1. Tap 📞.
2. Long tap a contact.
3. Tap the radio box in the top right of the screen.
4. Tap ➔ Delete contacts.
   The phone screen prompts you whether to delete all contacts.
5. Tap OK.

**Moving a Local Directory Contact to Blacklist**
You can move a contact in the local directory to blacklist. Incoming calls from this contact will be rejected automatically.

**Procedure**

1. Tap 📞.
2. If you want to select a contact to the specified contact group, tap Local Directory to select the desired contact group.
3. Tap after the desired contact.

4. Tap **Blacklist**.
   The phone screen prompts you whether to move this contact to the blacklist.

5. Tap **OK**.

**Searching for Contacts**

In the Local Directory, you can enter search criteria to find your desired contact quickly.

**Procedure**

1. Tap .

2. Do one of the following:
   - Tap .
     Enter a few continuous characters of the contact name or continuous numbers of the contact number (office, mobile or other number).
     The contacts whose name or phone number matches the entered characters will display in the result list.
   - Tap the desired letter (e.g., T) along the right side to jump to contacts whose names start with T or t.

**Blacklist**

Incoming calls from the blacklist contacts are rejected automatically. You can store 30 contacts in the blacklist to block unwanted callers.

Placing Calls
You can use your phone like a regular phone to place calls in many ways easily.

Topics
Placing a Call from the Dialer
Placing Multiple Calls
Placing a Call with a Speed Dial Key
Placing a Call Back to the Last Incoming Number
Redialing a Number
Dialing a Hotline Number
Placing a Call from the Call History
Placing a Call from the Directory
Placing an Anonymous Call

Placing a Call from the Dialer
The Dialer enables you to enter a number to place a call and display a list of previously placed calls or similar numbers in your directory. You can also select the desired contact from the search list, or select a contact from the placed call list or Directory before you enter the number.

Use your phone just like any other phone to make a call.

Note
Your system administrator can configure the source list for searching and disable to display the placed call records. Check with your system administrator to find out if they are available on your phone.

Procedure
1. Tap ☎
2. Enter a number.
   You can directly select a contact to call out.
Note
Your system administrator can enable live dialpad feature, which enables your phone to automatically dial out the phone number after a period of time without tapping the Send soft key. Check with your system administrator to find out if this feature is available on your phone.

Placing Multiple Calls
When you are in a call, you can hold your current call and place a new call.

Procedure
1. Tap More -> NewCall.
2. Enter the desired number or select a contact.
3. Tap Send.

Related Topic
Call Hold
Placing a Call with a Speed Dial Key
You can quickly dial a number which is used frequently or hard to remember by using a speed dial key.

Topics

Setting a Speed Dial Key Manually
You can set a line key as a Speed Dial key for a contact number.

Procedure
1. Navigate to Settings -> Features -> Dsskey.
2. Select the desired line key.
3. Select Speed Dial from the Type field.
4. Select the desired line from the Account ID field.
5. (Optional.) Enter the string that will appear on the touch screen in the Label field.
6. Enter the contact number that you want to dial out directly in the Value field.
7. Enter the key sequence that you want to send via DTMF in the Extension field.
8. Tap ✓.

Tip
You can drag the line key to the Edit field to set it as a Speed Dial key.

Speed Dialing a Contact Using a Speed Dial Key

Before You Begin
You need to set a line key as a Speed Dial key.

Procedure
1. Tap a Speed Dial key when the phone is idle.

Setting a Recall Key

Redialing a Number
The phone keeps a record of all the placed calls. You can call the recently dialed phone number.

Procedure
1. Tap  
   The phone screen displays the placed calls list.
2. Tap the desired record.
Dialing a Hotline Number
You can configure a hotline number and hotline delay. Then the IP phone will dial out the hotline number automatically after the delay time when you tap 📞 or the desired line key.

**Topic**

**Setting a Hotline Number and Delay Time**

**Setting a Hotline Number and Delay Time**

**Procedure**

1. Navigate to Settings > Features > Hot Line.
2. Enter the desired number in the Number field.
3. Enter the desired delay time between 0 and 10 (seconds) in the HotLine Delay field.
4. Tap ✅.

**Placing a Call from the Call History**
You can place calls to the contact from the Call History list. The Call History list contains missed calls, placed calls, received calls, and forwarded calls.

**Procedure**

1. Tap 📞.
   - The phone screen displays all call records.
2. Tap Local Calls and select the desired call list.
3. Tap the desired entry.

**Placing a Call from the Directory**
You can call contacts from your phone directories.

**Procedure**

1. Tap 📞.
2. Select the desired directory.
3. If the contact was added to a specified contact group, you can tap Local Directory to select the desired contact group.
4. Tap the desired contact.
   - If the selected contact has multiple numbers, tap the desired number to dial out.

**Related Topic**

**Searching for Contacts**

**Placing an Anonymous Call**
You can place a call to someone without revealing your identification by blocking your name or phone number from being displayed to the recipient.
Anonymous call is not available on all servers. Check with your system administrator to find out if this feature is available on your phone.

You need to enable anonymous call for a specific line first, and then place calls in this line.

**Topics**

*Enabling Anonymous Call*

Answering a Call

Procedure

1. Tap Answer.

Answering a Call When in a Call

When you are in an active call and an incoming call arrives on the phone, the call waiting tone beeps, and the incoming call information is displayed.

Before You Begin

Enable call waiting feature on the phone.

Procedure

1. Tap .

The active call is placed on hold, and the incoming call becomes active.

Related Topic

Enabling Call Waiting

Enabling Call Waiting

Call waiting enables you to receive another call when there is already an active call on your phone. If it is disabled, the new incoming call will be rejected automatically.

You can enable call waiting feature to avoid missing important calls during a call. You can also set the phone to play a warning tone when the new incoming call arrives.

Before You Begin

Check with your system administrator if the call waiting on code or off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to Settings > Features > Call Waiting.
2. Turn on Call Waiting.
3. Turn on Play Tone.
4. (Optional.) Enter the call waiting on code or off code respectively in the On Code or Off Code field.
5. Tap .

Answering a Call Automatically

Auto answer enables you to automatically answer an incoming call in speakerphone (hands-free) mode when your phone is idle. You can also enable auto answer mute to mute the local microphone when an incoming call is answered automatically.

Procedure
1. Navigate to **Settings** - > **Features** - > **Auto Answer**.
2. Turn on **Auto Answer**.
3. Turn on **Auto Answer Mute**.
4. Tap ✔️.

If the auto answer feature is enabled, the auto answer icon appears on the phone screen.

![Auto Answer Icon](image)

**Silencing or Rejecting Incoming Calls**

When you receive an incoming call, you can choose to silence or reject the call instead of answering.

**Topics**

- Silencing a Call
- Rejecting a Call Manually
- Rejecting Anonymous Calls Automatically

**Silencing a Call**

You can silence a call to stop your phone from ringing. Even if you silence the call, the incoming call notification continues to display on your phone.

**Procedure**

1. Tap 📞.

**Rejecting a Call Manually**

**Procedure**

1. Tap **Reject** to reject an incoming call.
Rejecting Anonymous Calls Automatically
You can set your phone to automatically reject incoming calls from callers who have withheld their caller ID information (including the name or phone number). As a result, your phone will not ring and you will not be notified of an attempted call.

Before You Begin
Check with your system administrator if the anonymous call rejection on code or off code is required. If required, get it from your system administrator.

Procedure
1. Navigate to Settings -> Features -> Anonymous.
2. Select the desired line.
3. Turn on Anonymous Rejection.
4. (Optional.) Turn on Send Rejection Code.
5. Enter the anonymous call rejection on code and off code respectively in the On Code and Off Code field beneath the Send Rejection Code field.
6. Tap ✔.

When the caller has anonymous call feature enabled and places a call to your IP phones, the call is automatically rejected.

Related Topic
Placing an Anonymous Call

Ending Calls

Procedure
1. Tap End Call.

Auto Redial
Auto Redial enables you to redial a phone number automatically when the callee is busy.

Topics
Setting the Auto Redial
Redialing a Call Automatically

Setting the Auto Redial
You can enable auto redial, set the number of auto redial attempts and the time to wait between redial attempts.

Procedure
1. Navigate to Settings -> Features -> Auto Redial.
2. Turn on Auto Redial.
3. Enter the desired time (between 1 and 300 seconds) in the Redial Interval field.
4. Enter the desired times (between 1 and 300) in the Redial Times field.
5. Tap ✔.

**Redialing a Call Automatically**

**Before You Begin**

Enable auto redial feature on the phone.

**Procedure**

1. When the callee is busy, the phone screen prompts whether to auto redial the contact, tap **OK** to activate auto redial.

   ![Phone Screen Prompting Auto Redial](image)

   The phone screen displays the redial times and interval.

2. Wait for the designated period of time or tap **OK** to redial the phone number immediately. The phone will retry as many times as configured until the callee answers the call.

**Call Mute**

You can mute the microphone of the active audio device during an active call so that the other party cannot hear you.

**Procedure**

1. To mute the microphone, do one of the following:
   - Tap the Mute touch key in any status.
   - When in a call, tap **Mute**.

2. To unmute the microphone, do one of the following:
   - Tap the Mute touch key again in any status.
   - When in a call, tap **Mute** again.

**Note**

Contact your system administrator, if you can only mute the microphone during an active call or the mute feature is deactivated when the active call ends.
Call Hold

You can place an active call on hold and resume the call when you are ready. When you place a call on hold, your IP PBX may play music to the other party while waiting.

Topics

Holding a Call
Resuming a Held Call
Swapping Between Active and Held Calls

Holding a Call

Procedure

1. Tap More->Hold during a call.
   The phone screen indicates that the call is on hold.

Resuming a Held Call

Procedure

1. Tap More->Resume or Resume.
   If multiple calls are placed on hold, select the desired call first.

Swapping Between Active and Held Calls

You can easily switch between active and held calls.

Procedure

1. Do one of the following to swap the active and held calls:
   - Tap Previous call/Next call to switch to the desired call screen.
   - Swipe left/right to switch to the desired call screen.
Do Not Disturb (DND)

DND enables your phone to reject all incoming calls automatically when you do not want to be interrupted.

If you want to receive specific numbers when DND is enabled, you can ask your system administrator to set DND Authorized Numbers.

</tbody>
</table>

Disabling DND

Procedure

1. Do one of the following:
   - Tap Exit DND mode, from the idle screen.
   - Swipe down from the top of the screen to enter the control center and toggle DND off.
   - Navigate to Settings > Features > DND, turn off DND Status and then tap ✔.

Redirecting Incoming Calls

You can redirect incoming calls by forwarding all incoming calls to a contact, forwarding an incoming call manually or forwarding incoming calls with a forward key.

Topics
Forwarding All Incoming Calls to a Contact

You can set up the IP phone to forward all incoming calls to a contact.

Procedure

1. Navigate to **Settings** > **Features** > **Call Forward**.
2. Tap the desired forwarding type.
   - **Always Forward**: Forwards all incoming calls.
   - **Busy Forward**: Forwards incoming calls when you’re in a call.
   - **No Answer Forward**: Forwards all unanswered incoming calls.
3. Turn on the desired forwarding type.
4. Enter the number you want to forward to in the **Forward To** field.
5. If you select **No Answer Forward**, tap the **After Ring Time** field to select the desired ring time to wait before forwarding.
6. Tap ✅.

The icon ⬤ in the status bar indicates that the call forward is enabled.

**Note**

You can also enter the SIP URI or IP address in the **Forward To** field.

Forwarding an Incoming Call Manually

You can manually forward the call to another contact while your phone rings.

Procedure

1. When the phone is ringing, tap 🔄.
2. Enter the number you want to forward the incoming call to.
3. Tap **Forward**.

The phone screen prompts a call forward message.

Forwarding Incoming Calls with a Forward Key

By default, when the phone receives an incoming call, you can easily the Forward key to forward the incoming call to a specific contact.

Topics

- Setting a Forward Key

Local Conference

Network Conference

Local Conference

The CP960 IP phone supports up to five parties (including yourself) in a conference call.

There are three ways to create a conference:

- Initiating a conference by dialing multiple numbers.
- Initiating a conference by inviting participants.
- Merging multiple calls into a conference.

If you connect a mobile phone and PC to your IP phones, you can also create a hybrid UC conference.

The following figure shows what the phone screen looks like in a five-way conference call:

![The avatar of the talking party shows water ripples](image)

1038 is talking

6054 is talking

Initiating a Conference by Dialing Multiple Numbers

Procedure

1. Tap ☎️.
2. Tap Call multiple members? Click here >>.
3. Enter the number of the first party then tap **Add members** or select a contact from **Directory** or **History**. The avatar of the first party appears on the top of touch screen. You can tap the avatar to cancel the addition.

4. Repeat the step 3 until you add all intended parties.

5. Tap 📞 to call all intended parties at the same time. The conference is set up after the intended parties answer the call.

**Note**
The value under the icon 📞 indicates the number of parties you have added and the maximum number of the parties you can add. For example, 📞 indicates you can add up to 4 parties and you have added 1 party.

### Initiating a Conference by Inviting Participants
You can invite one or multiple members at a time to join the conference.

**Procedure**

1. Place a call to the first party.
2. After the first party answers the call, tap **Invite** or tap one of the empty round space.
3. Do one of the following:
   - Enter the number of the second party, and then tap **Invite**.
   - Repeat the step above until you add all intended parties.
- Tap ☎️ to tap the desired contact to dial out.
- Tap 🔌 to tap the desired history record to dial out.
- Tap Call multiple members? Click here >>. Enter the number or select the contact, and then tap Add members to add multiple members.
- Tap ⌚ to call all intended parties at the same time.

**Merging Multiple Calls into a Conference Call**

**Procedure**

1. Tap Merge calls.

   The calls are merged into a conference call.
Creating a Hybrid UC Conference

You can merge the calls on your IP phones, the PC and connected mobile phone into a hybrid UC conference. There are many ways to create a hybrid UC conference, the following shows an example.

Before You Begin

Make sure you have an active PC audio and connected a mobile phone to your IP phone.

Procedure

1. Tap Invite or tap one of the empty round space.
2. Do the following to place a mobile call over Bluetooth on the IP phone.
   a. Enter the desired number and then tap Invite.
   b. Select the connected mobile phone in the pop-up dialog box.
3. Tap Invite or tap one of the empty round space.
4. Do the following to place an IP call.
   a. Enter the desired number and then tap Invite.
   b. Select the registered account.

1. Place a call to the first party.
2. When the first party answers the call, tap Invite or tap one of the empty round space.
3. Do one of the following:
   - Enter the number of the second party, and then tap Invite.
   - Tap Call multiple members? Click here >>, enter the number of the new party, and then tap Add members.
   - Repeat the step above until you add all intended parties.
   - Tap \(\text{to call all intended parties at the same time.}\

The conference is set up after the intended parties answer the call.

Note
The procedures for setting up a network conference call on specific servers may be different from the introduction above.
Call Recording

By default, the recorded files are saved in the internal SD card. You can connect a USB flash drive to your phone, and save the recorded audios to the connected USB flash drive.

Note
For more information on how to attach a USB flash drive, please refer to the phone’s Quick Start Guide at Yealink Support. You can record up to 12 hours in one file.

Topics
Recording a Call
Recording a Conference
Managing a Call While Recording
Playing a Recorded Call
Pause/Resuming a Playback
Fast Forwarding/Rewinding a Playback
Stopping a Playback
Deleting a Recorded File
Checking Storage Space

Recording a Call

You can record active calls on the phone. You cannot record calls when there are no connected calls, when you place a new call, transfer a call or initiate a conference, or when you have an incoming call.

Important
Before call recording, especially those involving PSTN, it is necessary to know about the rules and restrictions of any governing call recording in the country where you are.
It is also very important to inform all the call parties that you are recording and ask for their consent before recording the conversation.

Procedure
1. During a call, tap 🔊.
2. If a USB flash drive is connected, select where to save your recording.
   In this example, the recording will be saved to USB flash drive.
Recording a Conference

You can record conference calls in the same way as other calls with the following exceptions:

- All conference participants are recorded while recording. If one of the participants holds the conference call, only that participant is recorded. When a conference call is placed on hold, recording of the conference is paused. You can place or answer other calls, which will be recorded in the same file. When the conference call is resumed, recording of the conference resumes.
- All conference participants are recorded while recording. If one of the participants mutes the conference call, only that participant is not recorded.

Managing a Call While Recording

You can hold/resume, mute, transfer, place a new call or set up a conference call during recording. All calls you handle during a recording are recorded in the same file.

If your call is placed on hold, the recording is paused. It means that both you and the remote party are not recorded. If you mute the call, the muted party is not recorded.

Setting a Mark When Recording a Call

You can set a mark when recording a call to mark the special moment. And there will be a red flag on this moment when playing the recorded file so that you can drag to the moment quickly.

Procedure

1. Tap .

   The icon changes to , the number will increase if you set more marks.

Stopping a Recording

You can stop recording during a call. When you end a call during recording, the recording will also be stopped and saved as *.aac file in the internal SD card or the USB flash drive automatically.

Procedure

1. Do one of the following:
   - Tap .
The recording icon and recording duration disappears. A message is displayed, prompting that the call is recorded successfully.

- **Tap End Call.**

  The recording icon and recording duration disappears, and the phone returns to the Idle screen. A prompt message is displayed, prompting that the call is recorded successfully.

### Playing a Recorded Call

You can browse and play back the recorded files on your phone.

The recorded calls saved in *.aac format and include a date & time stamp and the other party’s number/IP address/name (or the first person’s number/IP address/name you called), for example, 20170515-1452-Tom was created on May 15, 2017, at 14:52 and you have a call with Tom.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>You can also play back the recorded calls on the phone or on a computer using an application capable of playing &quot;.aac&quot; files.</td>
</tr>
</tbody>
</table>

### Procedure

1. Tap ![Recorder](image) to launch the **Recorder** application.
2. If you want to play the recorded audio saved in USB flash drive, tap **USB**.
3. Tap ![Pause](image) before the desired recorded call to play the recorded call.

   The length of the recording and a progress bar are displayed as the recording plays.

You can tap the Volume key to adjust the volume of audio output.

### Related Topics

**Adjusting the Audio Volume**

**Pause/Resuming a Playback**

When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

### Procedure

1. Tap ![Pause](image) to pause playing the recording. The ![Pause](image) appears on the touch screen.
2. Tap ![Resume](image) to resume the playback.

**Fast Forwarding/Rewinding a Playback**

While a recorded file plays, you can fast forward or rewind the playback at any time.

### Procedure

1. Drag the slider to skip forward the playing or rewind the playing.

   If you have set marks for the recorded audio, you can drag the slider to the position with a red flag to listen to the marked moments.

**Stopping a Playback**

### Procedure
1. Tap 🎧 to stop the playing.

**Deleting a Recorded File**

You can delete local recordings or call recordings in Recorder application. The local recorded audios are named of a prefix “record@” and date & time stamp, while the call recordings are named of the date & time stamp.

**Procedure**

1. Tap 🎧 to launch the Recorder application.
   
   The phone screen shows all recorded files in the Audio Recorder list.
2. If you want to delete the recorded audio saved in USB flash drive, tap USB.
3. Tap ⚫️ after the desired recorded audio.
4. Tap Delete.
   
   The phone screen prompts you whether to delete the audio.
5. Tap OK.

**Checking Storage Space**

You can check the storage space (e.g., total space, available space) of the IP phone or connected USB flash drive.

**Procedure**

1. Tap 🎧 to launch the Recorder application.
2. If you want to check the storage space of the USB flash drive, tap USB.

![Audio Recorder List]

**Multicast Paging**

Multicast Paging allows you to easily and quickly broadcast instant audio announcements to users who are listening to a specific multicast group on a specific channel.

The IP phone supports the following 31 channels:

- **0**: Broadcasts are sent to channel 0. Note that the Yealink IP phones running old firmware version (old paging mechanism) can be regarded as listening to channel 0. It is the default channel.
- **1 to 25**: Broadcasts are sent to channel 1 to 25. We recommend that you specify these channels when broadcasting with Polycom IP phones which have 25 channels you can listen to.
- **26 to 30**: Broadcasts are sent to channel 26 to 30. We recommend that you specify these channels when broadcasting with Yealink IP phones running new firmware version (new paging mechanism).
Note that all IP phones in the multicast paging group must be deployed in the same network, since a broadcast is used. The IP phone can only send/receive broadcasts to/from the listened channels. Other channels' broadcasts will be ignored automatically by the IP phone.

**Topics**

Receiving Multicast Paging  
Managing a Paging Call

**Sending Multicast Paging**

Yealink IP phone supports up to 31 groups for paging. You can assign a label to each group to identify the phones in the group, such as All, Sales, or HR.

You can set a line key as Multicast Paging key or Paging list key on the phone, which allows you to send announcements to the phones with pre-configured multicast address(es) on specific channel(s).

**Note**

Multicast RTP is one way only from the sender to the multicast address(es) (receiver). For outgoing RTP multicasts, all other existing calls on the phone will be placed on hold.

**Setting a Multicast Paging Key**

You can set a Multicast Paging key for a paging group, which allows you to send announcements quickly on the idle screen.

**Before You Begin**

Get the multicast IP address and port number from your system administrator.

**Procedure**

1. Navigate to **Settings** -> **Features** -> **Dskkey**.
2. Select the desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Multicast Paging** from the **Key Type** field.
5. (Optional.) Enter the paging group name in the **Label** field.
6. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the **Value** field.
7. Enter the desired channel between 0 and 30 in the **Channel** field.
8. Tap ✓.

**Tip**

You can drag the line key to the **Edit** field to set a Multicast Paging key.
Setting a Paging List Key

You can set a Paging List key to easily access the paging groups on the idle screen.

Procedure

1. Navigate to Settings > Features > Dsskey.
2. Select the desired line key.
3. Select Key Event from the Type field.
4. Select Paging List from the Key Type field.
5. (Optional.) Enter the string that will display on the phone screen in the Label field.

Tip

You can drag the line key to the Edit field to set a Paging List key.

Setting a Paging Group

Before You Begin

Get the multicast IP address and port number from your system administrator.

Procedure

1. Tap the paging list key when the phone is idle.
   If the paging list key is not configured, you can also navigate to Settings > Features > Paging List to configure the paging list.
2. Tap after the desired paging group.
   The default tag is Empty if it is not configured before.
3. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the Address field.
4. Enter the string that will display on the phone screen in the Label field.
5. Enter the desired channel between 0 and 30 in the Channel field.
6. Tap .
7. To set more paging groups, repeat steps 2 to 6.

Deleting a Paging Group

Procedure

1. Tap the paging list key when the phone is idle.
   If the paging list key is not configured, you can also navigate to Settings > Features > Paging List to configure the paging list.
2. Tap after the desired paging group.
3. Tap Delete.
   The phone screen prompts you whether to delete the paging group.
4. Tap OK.
   If you want to delete all paging groups, you can tap on the top-right of the touch screen.
Sending a Paging by a Multicast Paging Key

Before You Begin
You need to set a Multicast Paging key in advance.

Procedure
1. Tap the Multicast Paging key when the phone is idle.
   Both your phone and receiver’s phone play a warning tone and the multicast RTP session will be automatically answered on the receiver’s phone in the speakerphone (hands-free) mode.
   The following figure shows a multicast RTP session on the phone:

   ![Multicast RTP Session](image)

Setting a Paging List Key
Receiving Multicast Paging
Your system administrator has set a listening paging group for you, and then you can receive a paging call when the phone is idle. The paging call is automatically answered on your phone.

When there is a voice call or a paging call in progress, the phone handles the new paging call differently according to the multicast listening settings configured by your system administrator.

Managing a Paging Call
During a paging call, you can do the following:

- Tap More->Hold to place the current paging call on hold. The paging call is placed on hold and the receiver releases the session.
- Tap More->Resume or Resume to resume the held paging call. The multicast RTP session is re-established.
- Tap DND to enable or disable DND mode.
- Tap Mute to mute the multicast RTP session.
- Tap to record a call.
- Tap End Call to end the paging call.
Advanced Features

This chapter explains how to use the advanced features on the IP phone.

Topics

If you require additional information or assistance with your new phone, contact your system administrator.

Hot Desking

Call Completion

When you place a call and the callee is temporarily unavailable to answer the call, call completion allows your phone to monitor the busy party and establish a call after the busy party becomes available to receive a call.

Note

Call completion is not available on all servers. For more information, contact your system administrator.

Topics

- Enabling Call Completion
- Using Call Completion

Enabling Call Completion

Procedure

1. Navigate to Settings > Features > Call Completion.
2. Turn on Call Completion.
3. Tap :.

Using Call Completion

Before You Begin

Enable call completion feature on the phone. You place a call and the callee is temporarily unavailable to answer the call.

Procedure

1. The phone screen prompts whether to wait for the callee, tap OK to activate the call completion feature.
2. When the callee becomes idle, the phone screen prompts whether to dial the number, **OK** to dial the number.

Enabling Call Completion

**Call Pickup**

You can use call pickup to answer someone else’s incoming call on your phone. Check with your system administrator to find out if this feature is available on your phone.

The Yealink IP phone supports Directed Call Pickup and Group Call Pickup.

- **Directed Call Pickup**: allows you to pick up incoming calls from another phone.
- **Group Call Pickup**: allows you to pick up incoming calls to any phone within a predefined group of phones, without dialing the extension of another phone.

**Topics**

- Picking up a Call Directly
- Picking up a Group Call Directly
- Picking up a Call with a Directed Pickup Key
- Picking up a Call with a Group Pickup Key
- Picking up a Call with a Directed Pickup Key
- Picking up a Call with a Group Pickup Key

**Picking up a Call Directly**

You can answer a call that rings on another phone.

**Before You Begin**

The target phone receives an incoming call. Your system administrator has enabled the directed call pickup and set the directed call pickup code.

**Procedure**

1. Tap 📞
   
   The **DPickup** soft key appears on the phone screen.
2. Tap **DPickup** on your phone.
3. Enter the phone number which is receiving an incoming call.
4. Tap **DPickup** again.
   The call is answered on your phone.

**Tip**

When the phone is idle, you can use a Directed Pickup or BLF/BLF List key to pick up a call to a specific contact directly.

**Related Topics**

Picking up a Remote Call by BLF Key
Transferring a Call by BLF Key

Setting a BLF Key
You can set a BLF key to monitor a specific line for status changes on the phone.

Procedure
1. Navigate to Settings > Features > Dsskey.
2. Select the desired line key.
3. Select BLF from the Type field.
4. Select the desired line from the Account ID field.
5. (Optional.) Enter the string that will display on the touch screen in the Label field.
6. Enter the phone number or the extension you want to monitor in the Value field.
7. Tap .

**Note**

You can drag the line key to the **Edit** field to set a BLF key.

### State Indicator of Remote Line by BLF Key

The following table shows the icon indicator associated with the line you are monitoring.

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>📞</td>
<td>The monitored line is idle.</td>
</tr>
<tr>
<td>📞</td>
<td>The monitored line is ringing.</td>
</tr>
<tr>
<td>📞</td>
<td>The monitored line is dialing.</td>
</tr>
<tr>
<td>📞</td>
<td>The monitored line is busy or in a call.</td>
</tr>
<tr>
<td>📞</td>
<td>The monitored line places a call on hold.</td>
</tr>
<tr>
<td>📞</td>
<td>The monitored line fails to register or does not exist.</td>
</tr>
</tbody>
</table>

### Visual Alert for Monitored Lines

Your system administrator can enable Visual Alert for BLF Pickup feature, which allows your phone to display the caller ID when the specified monitored line receives an incoming call.

You can pick up the call to the monitored line, place a call to the monitored line, place a new call or go back to the Idle screen.
Picking up a Remote Call by BLF Key

When a monitored line receives an incoming call, you can pick up the incoming call by tapping the BLF key. For example, if the monitor users are not at their desks and someone rings their lines, you can pick up the desired call simply by tapping the flashing BLF key.

Before picking up an incoming call, make sure that the directed call pickup code has been configured in advance.

Topics

Setting the Directed Call Pickup Code for BLF key

If your system administrator set the directed call pickup code in advance, you can use the BLF key to pick up the call directly. If not or if you want to set a pickup code for a specific BLF line, you can set a pickup code for BLF key manually.

Before You Begin

Get the directed call pickup code from your system administrator.

Procedure

1. Drag the BLF key to the Edit field.
2. Enter the directed call pickup code in the Extension field.
3. Tap ✔.

Picking up a Remote Call

When the monitored line receives an incoming call, the BLF icon of the monitored user will become and flashing.

Before You Begin

Make sure that the directed call pickup code for a BLF key or your system administrator has set the call pickup feature.
Procedure

1. Tap the BLF key to pick up the call for the monitored line directly.

Related Topic

Setting the Directed Call Pickup Code for BLF key

Transferring a Call by BLF Key

When there is already an active call on the IP phones, you can transfer the active call to the monitored line by tapping the BLF key.

The phone transfers (Blind Transfer or Attended Transfer) the active call differently depending on the Transfer Mode via Dsskey feature configured by your system administrator.

Topics

Performing a Blind Transfer
Performing a Semi-attended/Attended Transfer

Performing a Blind Transfer

Before You Begin

Check with your system administrator if the Transfer Mode via Dsskey is set to Blind Transfer.

Procedure

1. During a call, tap More -> Dsskey.
2. Tap the BLF key of the monitored user which you want to transfer this call to.

Performing a Semi-attended/Attended Transfer

Before You Begin

Check with your system administrator if the Transfer Mode via Dsskey is set to Attended Transfer.

Procedure

1. During a call, tap More -> Dsskey.
2. Tap the BLF key of the monitored user which you want to transfer this call to. The phone will dial out the number of the monitored line.
3. Tap the BLF key of the monitored user again to complete the transfer when the monitored user receives ringback or after the monitored user answers the call.

BLF List

BLF List feature enables you to monitor a list of users defined by your system administrator. For example, your system administrator has enabled BLF List feature and created a BLF List URI (for example, BLFList@example.com) with user1 and user2 in the list on the server. After configuration, the BLF List keys on the IP phone can present the status of user1 and user2, and the respective icons will either flash or glow depending on the status of monitored lines.

Check with your system administrator to find out if this feature is available on your phone.

Answering Calls

Placing a Call on Public Hold
You can place a call on public hold that any shared line phone can retrieve the held call.

Procedure
1. During a call, tap More -> Hold.
   The call is held on your phone, and all of the phones registered with shared line show the call is in a held state.

Placing a Call on Private Hold
In SCA scenario, you can place a call on private hold that only you can retrieve the held call. You need to configure a private hold key before you place the call on private hold.

Topics
Setting a Private Hold Key
Holding a Call Privately

Setting a Private Hold Key

Procedure
1. Navigate to Settings -> Features -> Dsskey.
2. Select the desired line key.
3. Select Key Event from the Type field.
4. Select Private Hold from the Key Type field.
5. (Optional.) Enter the string that will display on the phone screen in the Label field.
6. Tap ✓.

Tip
You can drag the line key to the Edit field to set a Private Hold key.

Holding a Call Privately
You can hold a call privately on a shared line using Private Hold key.

Procedure
1. During a call, tap More -> Dsskey, and then tap private hold key on the phone.
   The call is held on your phone, and the other phones registered with shared line show the call is in the busy state on the shared line key. Other users on the shared line cannot resume your held call.

Related Topic
Setting a Private Hold Key
Retrieving a Held Call Remotely on a Shared line

If you place a call on hold on a shared line, you can resume this call at any time. When the shared line key shows a call that is in a held state, you can resume the held call remotely from other user’s phone.

Before You Begin

There is at least one call placed on public hold on the shared line.

Procedure

1. Do one of the following:
   - Tap 📞.
   - Long tap the desired line key.
     Tap More -> Retrieve to retrieve the call.

Barging In an Active Call on a Shared line

In SCA scenario, both you and other users can barge into an active call on the shared line. Only one user can barge into a call at a time. After a user barges into a call, the call turns into a three-party conference.

Before You Begin

There is at least one active call on the shared line.

Procedure

1. Long tap the desired line key.

2. Tap More -> Barge In to interrupt the active call.

Pulling a Shared Call on a Shared line

In SCA scenario, both you and other users can pull an existing call from another shared phone that is an active or hold state.

Check with your system administrator to find out if this feature is available for your phone.
Before You Begin

There is an active or held call on the shared line.

Procedure

1. Long tap the shared line key.

2. Tap CallPull to pull the call.

Intercom

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary. This enables you to place an intercom call that is answered automatically on the contact’s phone as long as the contact is not in an active call.

Note

Intercom is not available on all servers. Contact your system administrator for more information.

When the target extension receives an incoming call, the intercom key icon of the target extension will change to 📻.

Before You Begin
The directed pickup code has set for Call Pickup feature by your system administrator or you have assigned the directed pickup code for an Intercom key in advance.

Procedure
1. Tap the Intercom key to pick up the incoming call directly.

Related Topic
Setting the Directed Call Pickup Code for Intercom Key

Answering an Intercom Call
By default, when there is an incoming intercom call, the phone plays a warning tone and this incoming call will be answered automatically. You can configure the behavior when receiving an intercom call.

Topics
Setting Intercom
Answering an Intercom Call
Setting Intercom
You can configure the following behavior when receiving an intercom call.

Intercom Allow
Intercom Allow feature allows the IP phones to automatically answer an incoming intercom call. If you disable this feature, the phone will reject incoming intercom calls and send a busy message to the caller. Intercom Allow feature is enabled by default.

Note
Your system administrator can set a period of delay time before the phone automatically answers intercom calls.

Intercom Mute
Intercom Mute feature allows the IP phones to mute the microphone when incoming intercom calls are answered automatically. Intercom Mute is disabled by default.

**Intercom Tone**

Intercom Tone feature allows the IP phones to play a warning tone before answering an intercom call automatically. Intercom Tone is enabled by default.

**Intercom Barge**

Intercom Barge allows the IP phones to automatically answer an incoming intercom call while an active call is in progress. The active call will be placed on hold. If you disable this feature, the IP phone will handle an incoming intercom call like a normal incoming call while there is already an active call on the IP phone. Intercom Barge is disabled by default.

**Note**

To enable the phone to receive a new incoming call when it already has an active call, make sure that the call waiting feature is enabled on the phone in advance.

**Procedure**

1. Navigate to **Settings** > **Features** > **Intercom**.
2. Make the desired changes.
3. Tap ✔️.

**Related Topic**

Enabling Call Waiting

**Answering an Intercom Call**

By default, the intercom call is automatically answered on your phone.

If your phone is set to answer intercom calls with your microphone muted, you need to tap the Mute key to unmute your microphone before responding to the call.

**Related Topics**

Muting or Unmuting the Microphone

**Voice Mail**

Voice Mail feature allows you to leave voice mails for someone or listen to your voice mail messages on your IP phone. This feature is set up on the server side and not all servers support this feature.

**Topics**

- Setting the Voice Mail Code
- Receiving a Voice Message
- Leaving Voice Mails
- Listening to Voice Mails

**Setting the Voice Mail Code**

If you want to connect your phone to the message center, you need to set the voice mail code on your phone.
Before You Begin

Get the voice mail code from your system administrator.

Procedure

1. Tap 📩 to launch Message application.
2. Tap Set Voice Mail.
3. Enter the voice mail code (for example, *4) in the desired account field.
4. Tap ✓.

Receiving a Voice Message

When receiving a new voice mail, the phone plays a warning tone and the power LED indicator slowly flashes red. A message of “n New Voice Mail(s)” (“n” indicates the number of unread voice messages) is displayed on the phone screen.

If the voice mail prompt box disappears, it will not pop up again unless the user receives a new voice mail or the user re-registers the account that has unread voice mail(s).

Note

Your system administrator can disable the prompt box for new message(s).

Leaving Voice Mails

You can leave a voice mail for other people when they are busy or inconvenient to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

Listening to Voice Mails

When the phone screen prompts that the phone receives a new voice mail, you can tap Connect to dial out the voice mail access code directly, or tap Exit to close the prompt box when you are not ready to listen to your voice mail.
You can also listen to your voice mails after the voice mail pop-up message box disappears.

**Before You Begin**

You need to set the voice mail code in advance.

**Procedure**

1. Tap 📩 to launch **Message** application.
2. Tap **View Voice Mail**.
   - The phone screen displays the amount of new and old voice mails.
   - You can tap the account to listen to voice mails.

**Related Topic**

**Setting the Voice Mail Code**

**Hot Desking**

Hot desking is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long, which means that actual personal offices would be often vacant, consuming valuable space and resources.

You can use hot desking to log out from the current account and then log into a new account. As a result, many users can share one same phone resource at different times.

**Note**

Hot desking is not available on all servers. Contact your system administrator for more information.

**Before You Begin**

Your system administrator has set a Hot Desking key for you to use this feature. Get the login account information from your system administrator.
Procedure

1. Tap the hot desking key from the DSS key screen.
   The phone screen prompts you whether to clear the account configuration.
2. Tap OK.
   Registration configurations of all accounts on the phone will be cleared immediately.
   The login wizard will be displayed.
3. Enter the login information.
4. Tap ✓ to log in.
System Applications

The system applications are pre-installed on your phone and they cannot be uninstalled. This chapter provides basic operating instructions for using the system applications.

Checking Storage Space

Recording Audios
By default, the recorded audios are saved in the internal SD card. You can connect a USB flash drive to your phone, and save the recorded audios to it.

Note
For more information on how to attach a USB flash drive, please refer to the Quick Start Guide for your IP phone on your phone's support page on Yealink Support.

Procedure
1. Tap to launch the Recorder application.
2. If you have inserted a USB flash drive, tap USB to save the recorded audio to USB flash drive.
3. Tap to start recording.
4. You can do one of the following:
   - Tap to pause the recording.
   - Tap to set a mark.
The icon changes to 🎧, the number will increase if you set more marks. And there is a red flag on this moment when playing the recorded audio.

5. Tap 🎧 to end the recording and save the recorded audio. The recorded audio will be displayed on the right list automatically.

### Playing the Recorded Audios

You can browse and play back the recorded audio files on your phone. The recorded audios are saved with the name consisting of a prefix “record@” and date & time stamp, for example, record@20170517-092310 was created on May 17, 2017, at 09:23:10.

When you receive an incoming call while playing a recording, the recording is paused automatically. If you reject the incoming call or end the handling call, the recording will continue to play automatically.

<table>
<thead>
<tr>
<th>Tip</th>
</tr>
</thead>
<tbody>
<tr>
<td>You can also play back the recorded audios on the phone or on a computer using an application capable of playing “.amr” files.</td>
</tr>
</tbody>
</table>

#### Procedure

1. Tap 🎧 to launch the **Recorder** application.
2. If you want to play the recorded audio saved in USB flash drive, tap **USB**.
3. Tap 🎧 before the desired recorded audio to play the recorded audio.
   
   The length of the recording and a progress bar are displayed as the recording plays.

### Pause/Resuming a Playback

When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

#### Procedure

1. Tap 🎧 to pause playing the recording. The 🎧 appears on the touch screen.
2. Tap 🎧 to resume the playback.

### Fast Forwarding/Rewinding a Playback

While a recorded file plays, you can fast forward or rewind the playback at any time.

#### Procedure

1. Drag the slider to skip forward the playing or rewind the playing.
   
   If you have set marks for the recorded audio, you can drag the slider to the position with a red flag to listen to the marked moments.

### Stopping a Playback

#### Procedure

1. Tap 🎧 to stop the playing.
Copy Audios to USB Flash Drive

**Before You Begin**

Before copying recorded audios to USB flash drive, you should connect a USB flash drive first.

**Procedure**

1. Tap to launch the Recorder application.
2. Tap after the desired recorded audios.
3. Tap Copy to USB.

If the recorded audio is copied successfully, the phone screen will prompt “Copy successfully”.

The prompt “XX Copied” (XX indicates the date when the recorded audio is copied to the USB flash drive) appears under the corresponding recorded audio.

Copy All Recorded Audios to USB Flash Drive

**Before You Begin**

Before copying recorded audios to USB flash drive, you should connect a USB flash drive first.

**Procedure**

1. Tap to launch the Recorder application.
2. Tap Edit.
3. Check the radio box on the top-left of the screen to select all recordings.
4. Tap Copy to USB.

The prompt “XX Copied” (XX indicates the date when the recorded audio is copied to the USB flash drive) appears under the corresponding recorded audio.

Renaming the Recorded Audios

**Procedure**

1. Tap to launch Recorder application.
3. If you want to rename the recorded audio saved in USB flash drive, tap USB.
4. Tap after the desired recorded audio.
5. Tap Rename.
6. Enter the desired file name.
7. Tap OK.

Deleting a Recorded File

You can delete local recordings or call recordings in Recorder application. The local recorded audios are named of a prefix “record@” and date & time stamp, while the call recordings are named of the date & time stamp.

**Procedure**

1. Tap to launch the Recorder application.
The phone screen shows all recorded files in the **Audio Recorder** list.

2. If you want to delete the recorded audio saved in USB flash drive, tap **USB**.

3. Tap after the desired recorded audio.

4. Tap **Delete**.
   
   The phone screen prompts you whether to delete the audio.

5. Tap **OK**.

### Deleting All Recorded Audios

You can delete all the recorded audios when you need additional space.

**Procedure**

1. Tap to launch **Recorder** application.
   
   The touch screen shows all recorded files in the **Audio Recorder** list.

2. If you want to delete the recorded audio saved in USB flash drive, tap **USB**.

3. Tap **Edit**.

4. Check the radio box on the top-left of the screen to select all recordings.
   
   The phone screen prompts you whether to delete all the audio files.

5. Tap **OK**.

### Checking Storage Space

You can check the storage space (e.g., total space, available space) of the IP phone or connected USB flash drive.

**Procedure**

1. Tap to launch the **Recorder** application.

2. If you want to check the storage space of the USB flash drive, tap **USB**.

Adding a Web Page to the Bookmarks List

Procedure

1. Tap to launch the Browser application.
2. Open the web page you want to bookmark.
3. Tap -> Save to bookmarks.
4. Edit the bookmark information in corresponding fields.
5. Tap OK.

The web page is added to the **BOOKMARKS** list.

**Opening a Web Page from the Bookmarks List**

**Procedure**

1. Tap 🌐 to launch the **Browser** application.
2. Tap ➡ to access the **BOOKMARKS** list.

   All pre-configured bookmarks are in the list.

4. Tap the web page you want to visit.
Editing a Bookmark

Procedure
1. Tap to launch the Browser application.
2. Tap to access the BOOKMARKS list.
   All pre-configured bookmarks are in the list.
3. Long tap the bookmark you want to edit.
4. Tap Edit bookmark in the pop-up dialog box.
5. Edit the bookmark.
6. Tap OK.

Deleting a Bookmark

Procedure
1. Tap to launch the Browser application.
2. Tap to access the BOOKMARKS list.
   All pre-configured bookmarks are in the list.
3. Long tap the bookmark you want to delete.
4. Tap Delete bookmark in the pop-up dialog box.
5. Tap OK.

Setting a Home Page

You can set the web page you visit most frequently as the home page. This web page opens automatically each time you open the browser.

Procedure
1. Tap to launch the Browser application.
2. Tap Settings -> General -> Set homepage.
3. Tap the web page you want to set as the home page in the pop-up dialog box.

**Tip**

You can also long tap a web page in **BOOKMARKS** list and then tap **Set as homepage**.

---

**Clearing the Navigation History**

You can periodically clear your navigation history to protect your privacy and prevent information disclosure.

**Procedure**

1. Tap ![Browser icon] to launch the **Browser** application.
2. Tap ![Settings icon] .
3. Tap **Settings** -> **Privacy & security** -> **Clear history**.
   The phone screen prompts you whether to delete the browser navigation history.
4. Tap **OK**.

**Modifying Browser Settings**

**Procedure**

1. Tap ![Browser icon] to launch the **Browser** application.
2. Tap ![Settings icon] -> **Settings**.
3. Customize the browser style you want.

---

**Clock**

You can use the **Clock** application to check the time of other cities in the world.

**Procedure**

1. Tap the digital clock from the Home screen.
   All pre-configured clocks are in the list.
2. Tap ![Clock icon] .
3. Drag up and down to scroll through the cities.
4. Check the checkbox(s) before the desired city.
5. Tap ![Back button] to return to the clock screen.
   The added clock of the desired city displays on the touch screen.
Using Your IP Phone with PC

You can connect a PC to your IP phone to use it as a speaker for calls or media played on your PC.

From your IP phones, you can do the following:

- Manage the PC audio. The PC audio is the audio from calls or media played on your PC.
- Merge the calls on your IP phones, the PC and connected mobile phone into a hybrid UC conference. For more information, refer to Creating a Hybrid UC Conference.
- Answer calls from other IP phones.

**Tip**

You can install a softphone (e.g., Yealink VC Desktop) on PC to make IP calls.

**Topics**

- Setting the Phone Play the PC Audio
- Managing the PC Audio
- Setting the IP Phone as PC Audio Device
- Disabling the PC Audio

### Setting the Phone Play the PC Audio

You can connect the PC when your IP phone is idle or when you have a call.

After connection, you can use the IP phone to play the PC audio.

#### Procedure

1. Connect the micro USB port of the IP phone and the USB port of the PC using a micro USB cable. The PC audio plays through your IP phone’s speaker.

   - When your IP phone is idle, the phone screen is shown as follows:
When there is a call or conference call on your IP phones, the original call or conference call is placed on hold. The PC audio plays through your phone’s speaker.

When you are placing a call, the dialing is cancelled. The PC audio plays through your phone’s speaker.

Managing the PC Audio
After connecting the PC to the IP phones, you can do the following:

- Place an active PC audio on hold.
- Mute or unmute the microphone.

Topics
Hold/Resume the PC Audio
Mutting or Unmuting the Microphone
Hold/Resume the PC Audio
When you place the PC audio on hold, you cannot hear any audio associated with the PC on your IP phone.

Procedure
2. Tap More -> Resume or tap Resume to resume the PC audio.

Muting or Unmuting the Microphone
The following occurs when you mute the microphone:
- The other party cannot hear you but you can still hear all other parties.
- You cannot record your voice on PC.

Procedure
1. Tap Mute or the Mute touch key.
   - Mute key LED indicators glow solid red. The touch screen indicates that the audio is muted.
2. Tap Mute or the Mute touch key again to unmute the microphone.

Setting the IP Phone as PC Audio Device
If you connect a PC to the IP phone, the PC will use the IP phone to play audio from calls or media by default. If not, you can set the IP phone as PC audio device. You can set the IP phone as PC audio device via softphone or PC.

Topics
Setting the IP Phone as PC Audio Device via Softphone
Setting the IP Phone as PC Audio Device via PC

Setting the IP Phone as PC Audio Device via Softphone
When your PC is connected to the IP phone, you can set the IP phone as PC audio input and output device via the softphone. Then you can play audio from the calls using the IP phone speakers and use the IP phone as your microphone.

The following takes setting the IP phone as PC audio input and output device via Yealink VC Desktop as an example. If you do not have the Yealink VC Desktop application, download the application from the Yealink VC Desktop Support page.

Procedure
1. In the top-left corner of the window, click the avatar icon to enter the settings window.
2. Click Device.
3. Select 扬声器(CP960) from the pull-down list of Speaker.
4. Select 麦克风(CP960) from the pull-down list of Microphone.
5. (Optional) Click Mic Test to test the microphone.
6. (Optional) Click Sound Test to test the speaker.

Setting the IP Phone as PC Audio Device via PC
When your PC is connected to the IP phone, you can set the IP phone as the default audio device for your PC and play audio from music and videos using the IP phone’s speaker.

Procedure
1. Click **Start** → **Control Panel** → **Sound**.
2. Click **CP960** and click **Set Default**.
3. Click **OK**.

**Disabling the PC Audio**

**Procedure**

1. Disconnect the USB cable from the IP phone.
Using the CP Wireless Expansion Mic CPW90

This chapter provides basic operating instructions for the wireless expansion microphone CPW90.

Topics
Placing the CPW90
Turning the CPW90 On or Off
Registering the CPW90
Registering the CPW90 with Another IP Phone
Unregistering the CPW90
Muting or Unmuting the CPW90
Idle Mode
Viewing CPW90 Information
Finding the CPW90
Charging the CPW90
CPW90 LED Instructions
CPW90 Working Frequency

Placing the CPW90
The CPW90 has rubber pads on its base to prevent it from sliding. You can place the CPW90 on a conference table. Do the following to ensure optimal voice quality:

- The CPW90 should be less than 20 meters distant from the IP phones, and is not disturbed by obstacles.
- Place the CPW90 on a stable surface and keep it away from obstacles so that it can effectively pick up sounds.

![Diagram](image.png)

Turning the CPW90 On or Off

Procedure
1. You can do the following to turn on the CPW90:
   - Put the CPW90 on a charging cradle, the CPW90 starts up automatically.
   - If you do not charge the CPW90, long tap on the CPW90 for 3 seconds.
     The battery LED indicator glows solid green for one second and then goes out.
2. To turn off the CPW90, long tap on the CPW90 until the battery LED indicator on the CPW90 glows solid red for 3 seconds and then goes out.
Registering the CPW90

The Yealink CPW90 is a CP Wireless Expansion Mic which works as an audio input device for CP960 IP phone. It features superior audio technology and supports 360-degree voice pickup range at a radius of up to 10 feet (3 meters) without any wiring troubles. To ensure good voice quality of the calls on the IP phones, you can register CPW90 with the IP phone to use the CPW90 as the external audio input device.

CPW90 can only be registered with one IP phone at a time, if you register the CPW90 to another IP phones, the CPW90 will deregister from the previous IP phone automatically.

**Note**

If you buy CP960-WirelessMic, the CPW90 is registered with the IP phone by default.

**Procedure**

1. Navigate to **Settings** > **Basic Settings** > **Wireless Microphone**.
2. Tap + to search for CPW90.
3. Turn on the CPW90.

The CPW90 will enter the registration mode automatically. And the mute LED indicator on the CPW90 fast flashes yellow.

The CPW90 registers with the IP phone automatically. If the registration is successful, the mute LED indicator on the CPW90 goes out and the touch screen of IP phone prompts the CPW90 information: battery, work time and standby time.
Registering the CPW90 with Another IP Phone

Procedure
1. Navigate to Settings -> Basic Settings -> Wireless Microphone.
2. Tap to search for CPW90.
3. Put the CPW90 on the charging cradle and make sure it is charging.
4. Long tap the Mute key on the CPW90 for 5 seconds.

The CPW90 enters the registration mode. And the mute LED indicator on the CPW90 fast flashes yellow.

The CPW90 registers with the IP phone automatically.

Unregistering the CPW90

Procedure
1. Navigate to Settings -> Basic Settings -> Wireless Microphone.
2. Select the desired microphone and then tap Detail.
3. Tap Unbind to deregister the CPW90.

Muting or Unmuting the CPW90

Procedure
1. Tap the Mute key to mute the call.
   The mute LED indicator glows solid red. And the icon appears on the status bar of the IP phone.
2. Tap the Mute key again to unmute the call.
   The mute LED indicator glows solid green. And the icon disappears from the status bar of the IP phone.
Idle Mode
When the CPW90 registers with the IP phone successfully, the CPW90 enters the idle mode. You can tap the Mute key on the CPW90, the battery LED indicator on the CPW90 glows solid green for 3 seconds and then goes out.

Viewing CPW90 Information
When the CPW90 is registered with the IP phones, you can view CPW90 status on the IP phone.

Available information of CPW90 includes:
- Register Status
- Mic Model
- MICPOD IPEI
- Battery Percent
- Standby Time (estimated standby time)
- Work Time (estimated working time)

Procedure
1. Navigate to Settings -> Basic Settings -> Wireless Microphone.
2. Tap Detail from the desired microphone block.

Finding the CPW90
You can find the CPW90 which has registered with the IP phone.

Procedure
1. Navigate to Settings -> Basic Settings -> Wireless Microphone.
2. Tap Find from the desired microphone block.
The mute key LED indicator on the registered CPW90 flashes red and green alternately.

Charging the CPW90

Procedure
1. Put the CPW90 on the charging cradle.
2. Connect the micro USB port on the charging cradle to the USB port on the phone using a 0.3m micro USB cable.

During charging, the battery LED indicator on the CPW90 glows solid red. When the battery capacity reaches 100%, the battery LED indicator on the CPW90 will glow solid green.
**Note**
If it is the first time you use the CPW90, you need to fully charge the CPW90 for normal use. If the CPW90 is not in use, we recommend you to charge the CPW90 even when the battery is full.
If your system administrator disables the USB port of the phone, the phone cannot power to the USB port.

Using CP960 Star Connection Feature

You can deploy up to four CP960 phones in a star layout. In the star connection group, one phone acts as a master phone, while other phones act as the slave phones. The master phone keeps all features, while the slave phones only sync some key features of the master phone, such as DND and call mute. After connecting, the slave phones are mainly used to work as speakers or microphones.

Before You Begin

Make sure all the phones are deployed in the same subnet. And all the phones are running the same firmware versions.

Rebooting Your Phone
The improper operation may cause malfunction. If the malfunction occurs, your system administrator may ask you to reboot your phone.

Procedure
1. Navigate to Settings -> Advanced Settings (default password: admin) -> Reboot -> Reboot.
   The phone screen prompts you whether to reboot the phone.
2. Tap OK to reboot the phone.

Resetting to Factory Settings
Generally, some common issues may occur while using the IP phone. Your system administrator may ask you to reset your phone to factory configurations after you have tried all troubleshooting suggestions but still do not solve the problem. This operation will delete all your personal configuration settings, and reset all settings to the factory defaults. Check with your system administrator if the personalized settings are kept before resetting your phone to factory settings.

Procedure
1. Navigate to Settings -> Advanced Settings (default password: admin) -> Reset Config.
2. Tap Reset to Factory Settings.
   The phone screen prompts you whether to reset the setting.
3. Tap OK.
   The phone begins resetting.
   
   **Tip**
   You can also long tap the left Mute key when the phone is idle.
   
   After reset, the screen "Initializing...".
   
   The phone will be reset successfully after startup.

   **Note**
   Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.

Updating the Phone Configuration
Your system administrator may ask you to update your phone configurations.

Procedure
1. Navigate to Settings -> Advanced Settings (default password: admin) -> Auto Provision.
2. Enter the provision information in the corresponding field.
3. Tap ✓.
   The phone screen prompts you whether to provision now.
4. Tap OK.
